## **12.0 Corporate and Social Responsibilities Statement**

Power Testing Ltd is aware that what we do as a business affect the environment and others around us. We are therefore committed to review our company policy and procedures to include and embed Global Compact principles, this will then form part of our strategy and daily activities.

To ensure our social responsibility we review our supply chain and preferred supplier list thus ensuring that our suppliers observe human and employee rights.

We are working towards environmental accreditation and are actively trying to improve our carbon footprint. As stated previously we have health care available to all members of staff and excellent working conditions.

Power Testing Ltd has recently moved from a decentralised method of purchasing with engineers ordering their own materials to a centralised method. All purchasing takes place through one source so that acquisitions can be tracked to ensure that only preferred suppliers are use and that our supply chain meet the requirements that we have set out in our company policy. This new procedure also enables us to maintain a responsible level of wastage when buying equipment or tools for our staff and monitor cost allocation so that we may pass them onto our clients.

We try to ensure that any new purchases have as little effect to the environment as possible and develop COSHH Assessments to ensure that any incidents are dealt with correctly and limit environmental impact.
